Cevdet Erek “Ankara Modern, Sketches for a set of nesting tables and rhythms”

Cevdet Erek uses Masa’s structure to create a set of other “masa”s which could be used as additional exhibiting platforms while the idea of “zigon”s is adapted to the very typical dance beat from Ankara. All sketches of a possible production of the idea are being shown in Masa.

Cevdet Erek was born 1974 in Istanbul. He studied on Sound Engineering and Design and architect at MSU and ITU. He lives and works in Istanbul
